# Bitmoji

# Why Use Bitmoji?

- Foster personal connections
- Shows we can be relatable
- Playful, silly, yet appropriate
- Make students feel special with personalized messages!

Bitmoji

# Create & Build a Bitmoji

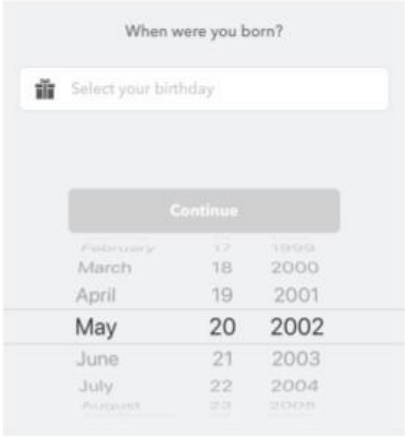
**Step 1: (App)** To create and build a Bitmoji, you need to start with the app. This can be done on a SmartPhone (iPhone or Android) or tablet/iPad.

Download on the App Store

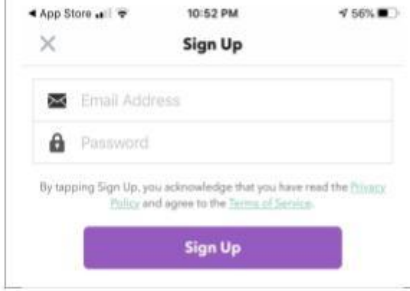
GET IT ON Google Play

**Step 2: (App)** After you download the app & open it, you will see this screen. To create a new bitmoji, click "Sign up with Email".

**Step 3: (App)** Add your birthday.
**This is just to see that you're over the age of 13.*



**Step 4: (App)** Type username & password



**Step 5: (App)** Start to craft your bitmoji

**Step 6: (Computer)** Through browser, download the Chrome Extension. Sign-in with the same email that you used through the app.

## How To Edit a Bitmoji

1) Log into your Bitmoji account through the App on a SmartPhone.
2) Select "Avatar" button at the bottom and make adjustments.

3) Through the Chrome Extension, make sure you sign-in using the same email as the SmartPhone app!

## School vs. Personal Bitmoji

You can create one Bitmoji per account through the App. You can create as many accounts as you would like (just all through different email addresses).

Whatever email address you log into through the Chrome Extension, that is the Bitmoji that will sync with your Chrome browser.

# After you create your account...

Download the Bitmoji Chrome Extension & sign-in with the same account you used on your Smart Device to create your avatar.

# Finding Your Bitmoji

- Chrome Extension
- Gmail
