THE ART OF ONLINE TEACHING AND REMOTE LEARNING

Summer Graduate Workshop June 7-July 16, 2021

Maximizing Teaching and Learning Online, Hybrid and In Person

The Art of Online Teaching and Remote Learning workshop is a 6-week course designed to prepare teachers, technology coaches, administrators, and other education personnel to manage the technology, logistics, pedagogy, and underlying issues at the heart of our teaching in response related to COVID19. The summer workshop will include two three-hour courses and will be treated as one 6-hour block.

Graduate Credit $1200 for 6 hours of Graduate

- The normal tuition for 6 -hours of graduate credit would be $2972. So less than ½ the normal cost.

YOU WILL LEARN

- Learn new resources, and methods to keep students engaged.
- Learn to create content and how to adapt it to the classroom online and in person.
- Learn to design and structure your online digital classroom.
- Learn tools, apps, and websites to create appealing course materials for students of all grade levels and content areas.
- Learn how to create videos easily, professionally, and without expensive equipment.
- Learn to deploy powerful technologies equitably.
- Learn how to share materials digitally with ease and how to work with those who are without digital access/ accessibility.
- Learn about resources and methods to receive assignments, projects, and conduct evaluations.
- Learn to transfer the basics of pedagogy and apply Marzano's Pedagogy with Technology.

What can we do now, that we simply couldn't do before?

What have we learned to take forward?

EDCI 795: Problems (P-12 Online Teaching and Learning) 6 Credit Hours

Your total cost will be substantially reduced this summer at only $200 a credit hour.

We have learned a great deal this past year+ and there is no doubt we think think of online teaching is connecting with a new vision of education, we are using a growth mindset to engage and a simple question ...**What have we learned and what can we do now were could not do before?**

Most of you us are teaching beyond the packets and the seat of our pants, but let's move to the next level and really engage our students, **online**, **hybrid** and **in person**. The problem P-12 is still struggling to address is how to move from emergency correspondence delivery of instruction to true delivery of instruction that is engaging, equitable and accessible to all students.

So we are changing up the classes just a bit for this summer for graduate students. This will be a 6-credit hour bundle to get you up and rolling faster. They will be more workshop-like rather than rigid graduate classes. We hope you will join us this summer for this unique opportunity.

Preparing to Teach Online, Hybrid & in person

- ✓ Defining Literacy in the "New Normal" of Online Teaching and Remote Learning
- ✓ Working from Home: setting up a workspace
- ✓ Setting reasonable expectations, schedule/agenda, flexibility and boundaries
- ✓ Planning individually and in teams, by content area and/or grade levels, and consolidating plans
- ✓ Meeting the needs of students in Special Education, students with disabilities, and ELL/ESL students
- ✓ Supporting differentiation and equity
- ✓ Meeting with students, engaging students, involving students, and working independently (depending on age)
- ✓ Examining Pedagogy for online teaching
- ✓ Distance learning away from the technology Selecting the Tools
- ✓ What do you want/need your students to do with technology?
- ✓ What tools will meet that need?
- ✓ What tools can help engage students and enhance learning?

Unleashing the Possibilities in Our Classroom in all formats

- ✓ Digital assessments
- ✓ Demonstrations of learning
- ✓ Student publishing
- ✓ Visual storytelling

- ✓ Student creation, collaboration, critical thinking, communication, curation
- ✓ Engaging presentations using a variety of tools
- ✓ Virtual Reality and Augmented Reality
- ✓ Reflection
- ✓ Google Tools for Education and Chrome Extensions
- ✓ Social Media in the classroom, professional development
- ✓ Video creation, screencasting
- ✓ Conducting successful discussions and activities
- ✓ Games, coding, scavenger hunts, choice menus and more

Designing your materials for engagement

- ✓ Copyright and creative commons
- ✓ Designing for your online classroom, the elements
- ✓ Creating titles to grab your students attention, creating a hook
- ✓ Text, color, layout, and design tips
- ✓ Images and where to find ones you can actually use
- ✓ Tools for design creation
- ✓ Digitizing materials and more
